

## HAPPY NEW YEAR

*We are wishing all of you a very happy and healthy New Year.*

Here at Advanced Hearing Care we are looking forward to all the new things that will be coming our way in the New Year. We are working on a new website that should be up and running by the end of January, and we are planning a facebook page. So all of you who are tech savvy, and are keeping up with social media, we hope that you will like us on facebook. We might even start a blog or twitter.

### Personal Microphones

FM technology has been in the classroom for several years. It allows the students to hear the teacher's voice above classroom noise. This technology has now become available for individual use. Several of our patient's, who have purchased these products, tell us that conversations in competing noise are significantly clearer. These situations include riding in the car as well as noisy restaurants. Their companion's voices are delivered directly to their hearing aids. The device is about two inches long. These devices can be purchased to adapt to your current hearings aids, as long as they have been purchased in the last two or three years. Come into the office and we can demonstrate this improvement.

### A word of caution

With the colder weather coming upon us, we will be wearing items on our heads, such as hat and scarves. Some of our outerwear will be pulled over our heads. We are always cautioning people to be careful that our hearing aids remain in our ears after we come in from the cold and remove these items.

We look forward to seeing all of you in the coming year.
